

Product Specification Sheet
Spent Coffee Grounds Animal Bedding
Sustainable Resources Group

<https://UpcycledCoffee.com>

Product Description

Upcycled spent coffee grounds processed into a premium, natural animal bedding.

Available in two complementary formats:

- **Loose Dry Grounds** – Most popular style for superior odor control and siftability.
- **Compressed Grounds (pelletized)** – Designed to work together with the loose version. As animals move through the bedding, pellets mix with the loose grounds, and break down for optimal texture, absorbency, and performance.

Made from 100% spent coffee grounds. Sustainable and compostable.

Key Benefits

- Excellent natural ammonia odor absorption
- Clumps around droppings similar to cat litter for easy daily sifting and spot-cleaning
- Long-lasting (typically 6-12 months with regular spot-cleaning)
- Low dust
- Reduces labor compared to traditional bedding options

Physical Specifications

Property	Loose Dry Grounds	Compressed Grounds (pelletized)
Material	Processed spent coffee	Processed spent coffee
Form	Loose granular	Compressed pellet
Moisture Content	6-12%	6-12%
Particle Size	125-840 microns	2400 microns
Bulk Density	25-27.5 lb/cuft	38-40 lb/cuft
Dust Level	Low	Low
Color	Dark brown	Dark brown
Initial Aroma	Mild coffee	Mild coffee

Performance Claims

- **Absorbency:** Strong volume-based absorption with excellent water retention and low drainage loss.
- **Ammonia Odor Control:** Superior natural neutralization
- **Clumping / Sift-ability:** Excellent, forms clumps for easy daily removal
- **Longevity:** 6–12 months with regular spot-cleaning
- **Compost-ability:** Yes, fully compostable
- **Safe:** No harmful levels of caffeine

Recommended Usage

- **Application Depth:** 1-2 inches (or as needed for species)
- **Daily Maintenance:** Spot-clean clumped areas and droppings
- **Full Replacement:** Every 6-12 months depending on animal density and ventilation
- **Best For:** Chickens, ducks, turkeys, quail, rabbits, and other small animals
- **Mixing Recommendation:** Use a combination of loose and compressed for best results.
Compressed breakdown naturally with animal activity and moisture

Safety & Quality

- Upcycled from food and beverage residuals
- Post-extraction, no harmful levels of caffeine
